These days, for some people, your **computer** is your lifeline. You use it to keep in touch with people, to work and to play. While the **computer** is a great tool and can provide great deal entertainment, it's not perfect. If it was perfect, you'd never have to replace or get work done to it. Your **computer** can, and at some point in time, will probably give you enough problems to make you want to throw it out the nearest window.

When that happens, that's when you try and find someone to come out and **repair** your problems. You call around, checking all the big name **repair** companies. And then you get sticker shock, and how much these places want to charge you! And that's where PC Pros 2 Go comes in. Our primary goal is to provide excellent [computer services](#) at affordable prices!

The cost to fix your **computer** should never be more than the price to buy a new one. And with *PC Pros 2 Go*, it never will be. If we diagnose your computer and find it to be more costly to fix it than it's worth, we **will** recommend you consider replacing the **computer** versus fixing it. Since we don't typically sell **computers**, a replacement recommendation doesn't help us, it helps you. In fact, we'll even evaluate your
